SUBJECT INDEX

PAGE

Earth's core and mantle
Relations between electrical conductivity of a mantle and fluctuating magnetic fields, *A. F. Kuckes* 119
Free oscillations of the laterally inhomogeneous Earth: Quasi-degenerate multiplet coupling, *Peter C. Luh* 187
A correction to the excitation of the Chandler wobble by earthquakes, *F. A. Dahlen* .. 203
Residual deformation of real Earth models with application to the Chandler wobble, *Moshe Israel, Ari Ben-Menahem & Sarva Jit Singh* 219

Electrical
Correspondence between the magnetotelluric and field penetration depth analysis for measuring electrical conductivity, *A. F. Kuckes* 381
A note on reversals of magnetic fields due to induction in shelving oceans by external agencies, *R. C. Hewson-Browne, V. C. L. Hutson & P. C. Kendall* 483

Letter to the Editors
Low-frequency spectra in seismic waves from explosions, *M. J. Randall* 387

Meteorology
The Earth's rotation and atmospheric circulation—I. Seasonal variations, *Kurt Lambeck & Anny Cazenave* 79

Oceanography
The circulation of the Bristol Channel, *P. Hamilton* 409
Residual drift near the sea bed in Liverpool Bay: an observational study, *A. R. Halliwell* .. 439

Palaeomagnetism
Palaeomagnetic results from Palaeozoic rocks of south-east Australia, *G. R. Luck* 35
The palaeomagnetism of the Foyers Plutonic Complex, Inverness-shire, *Sylvia J. Kneen* .. 53
Palaeomagnetism of the Canary Island and Madeira, *N. D. Watkins* 249
Palaeomagnetism of Tertiary basalts from Libya, *A. Schult & H. Soffel* 373
Rapid measurement of the magnetic susceptibility of long cores of sediment, *L. Molyneux & R. Thompson* 479

Physics of rocks
Boundaries and fractures in finite element models of geological structures, *K. G. Service & A. Douglas* 1
On the compression of stishovite, *E. K. Graham* 15

Research Notes
Rapid measurement of the magnetic susceptibility of long cores of sediment, *L. Molyneux & R. Thompson* 479
A note on reversals of magnetic fields due to induction in shelving oceans by external agencies, *R. C. Hewson-Browne, V. C. L. Hutson & P. C. Kendall* 483

Seismology
Radiation of Rayleigh wave energy from nuclear explosions and collapses in southern Nevada, *Robert P. Massé* 155
Diffraction by anomalous regions in the Earth's mantle, *J. H. Woodhouse* 295
Amplitude variations with azimuth and distance of short-period *P* waves recorded at some Iberian stations, *G. Payo* 339

PAGE

Radiation from an explosion in a non-uniformly pre-stressed medium, *Anil Grover* 351
Low-frequency spectra in seismic waves from explosions, *M. J. Randall* 387
The effects of scattering on seismic wave pulses, *B. L. N. Kennett* 389
Comparison of station errors in seismology, *Harold Jeffreys & Kehar Singh* 423
Reflection and transmission of Rayleigh waves in a wedge—II. *K. Viswanathan & Arabinda Roy* 459

Theoretical physics
Numerical application of a technique for recovering the spectrum of a time function, *Flavian Abramovici* 65
Legendre functions, the Hilbert transform and surface waves on a sphere, *J. H. Ansell* .. 95
Body-force equivalent calculations from permanent deformation in the near field, *E. Nyland* 279

Upper atmospheric and Earth's magnetism
The perturbation of alternating geomagnetic fields by three-dimensional island structures, *L. R. Lines & F. W. Jones* 133
Electromagnetic induction in the Earth by a symmetric non-uniform source, *R. D. Hibbs & F. W. Jones* 269
Modelling geomagnetic variations in or near an ocean using a generalized image technique, *J. P. Greenhouse, R. L. Parker & A. White* 325

SUBJECT INDEX

PAGE

Book reviews
Coronal expansion and solar wind 127
The analysis of tides 375

Data Processing
Filtering of dispersed wavetrains, *M. Cara* 65
The retrieval of harmonics from a covariance function, *V. F. Pisarenko* 347

Dynamo Models
On large magnetic Reynolds number dynamos, *D. Gubbins* 57

Earth's core and mantle
The coupling of the core to the precession of the Earth, *F. D. Stacey* 47
North Atlantic oceanic topography and lateral variations in the upper mantle. *B. I. R. Haigh* 403

Earth's crust
The British Tertiary igneous province, *A. L. Evans* 247
Kinematics and heat flow in a volcanic rift zone, with application to Iceland, *G. Palmason* .. 449

Geomagnetism
A geomagnetic variation anomaly across the northern Gulf of California. *A. White* 1
Anomalies in geomagnetic variations across the central Gulf of California, *A. White* 27
The reversal of the vertical magnetic field near the coastline of a shelving ocean—A reply, *A. A. Ashour* 367
The modelling of oceans by spherical caps, *V. C. L. Hutson, P. C. Kendall & S. R. C. Malin* .. 375

Instrumentation
Stability of strain-meter mounts, *G. J. Jeffrey & P. H. Sydenham* 185

Interplanetary medium
Pitch angles of solar wind particles in the interplanetary magnetic field, *V. C. A. Ferraro* .. 481

Ionosphere
Neutral air wind influences deduced from solar cycle changes in the F2 region equatorial anomaly, *G. M. Brown* 93

Letters to the Editors
The British Tertiary igneous province, *A. L. Evans* 247
A proposal for the global calibration of group earthquake locations, *Bruce A. Bolt* 249

Oceanography
The influence of density stratification in shoaling in a tidal estuary, *R. C. McGregor* 157
Corrected tables of tidal harmonics, *D. E. Cartwright & Anne C. Edden* 253

PAGE

Palaeomagnetism

Palaeomagnetism and palaeosecular variation on lavas from Norfolk and Philip Islands, South-west Pacific Ocean, *Aziz-Ur-Rahman & I. McDougall* 141
A pilot study of the palaeomagnetism of some Pre-Cambrian dykes from East Antarctica, *B. J. J. Embleton & P. A. Arriens* 239
On the representation of the Quarternary and Late Tertiary geomagnetic fields in terms of dipoles and quadrupoles, *Kenneth M. Creer, Daniel T. Georgi & William Lowrie* .. 323

Physics of rocks

Low temperature oxidation of ferromagnesian olivines—a gravimetric and magnetic study, *G. S. Hoye & W. O'Reilly* 81
Identification of high-pressure phases of rocks and minerals from Hugoniot data, *G. F. Davies & E. S. Gaffney* 165

Research Notes

Damping of *P* and *S* at short distances, *Harold Jeffreys* 237
A pilot study of the palaeomagnetism of some Pre-Cambrian dykes from East Antarctica, *B. J. J. Embleton & P. A. Arriens* 239
The reversal of the vertical magnetic field near the coastline of a shelving ocean—A reply, *A. A. Ashour* 367
Rigid plates, buffer plates and sub-plates—Comment on 'Active tectonics of the Mediterranean region' by D. P. McKenzie, *C. Roman* 369
Pitch angles of solar wind particles in the interplanetary magnetic field, *V. C. A. Ferraro* .. 481
The relative efficiency of earthquakes and explosions in exciting surface waves and body waves, *Freeman Gilbert* 485

Seismology

Travel time of *S*, *PcP* and *ScS* from Pacific earthquakes, *M. L. Gogna* 103
High frequency shear waves guided by a continuous lithosphere descending beneath western South America, *B. L. Isacks & M. Barazangi.* 129
P signal complexity re-examined. *A. Douglas, P. D. Marshall, P. G. Gibbs, J. B. Young & C. Blamey* 195
Ray theory for a pre-strained medium, *K. Walton* 223
Damping of *P* and *S* at short distances, *H. Jeffreys* 237
A proposal for the global calibration of group earthquake locations, *B. A. Bolt* 249
Scaling law of earthquake source time-function, *K. Aki* 251
Time-term analysis of New Britain–New Ireland arc structures, *D. M. Finlayson & J. P. Cull* .. 265
Identification of free oscillation spectral peaks for 1970 July 31, Colombian deep shock using the excitation criterion, *Jorge A. Mendiguren* 281
Interpretation of *Lg*, *L. Knopoff, F. Schwab & E. Kausel* 387
Distribution of seismic foci in the Mediterranean and surrounding area and its tectonic implication, *B. C. Papazachos* 419
The interaction of seismic waves with horizontal velocity contrasts, *B. L. N. Kennett* 429
The relative efficiency of earthquakes and explosions in exciting surface waves and body waves, *F. Gilbert* 485

Tectonics

Rigid plates, buffer plates and sub-plates—Comment on 'Active Tectonics of the Mediterranean region' by D. P. McKenzie, *C. Roman* 369

Palaeomagnetic studies in the British Caledonides—I. Igneous rocks of the Builth Wells–Llandridnod Wells Ordovician inlier, Radnorshire, Wales, *J. D. A. Piper & J. C. Briden* 1
Palaeomagnetic studies in the British Caledonides—II. The Younger Gabbros of Aberdeenshire, Scotland, *J. T. Sallomy & J. D. A. Piper* 13
Palaeomagnetic studies in the British Caledonides—III. Igneous rocks of the northern Lake District, England, *J. C. Briden & W. A. Morris* 27
Palaeomagnetic studies in the British Caledonides—IV. Lower Devonian lavas of the Strathmore region, Scotland, *J. T. Sallomy & J. D. A. Piper*.. 47
Palaeomagnetic studies in the British Caledonides—V. Miscellaneous new data, *W. A. Morris, J. C. Briden, J. D. A. Piper & J. T. Sallomy* 69
Palaeomagnetic studies in the British Caledonides—VI. Regional and global implications, *J. C. Briden, W. A. Morris & J. D. A. Piper* 107
Palaeomagnetism of Precambrian Birrimian and Tarkwaian rocks of West Africa, *J. D. A. Piper & Keith Lomax* 435
Palaeomagnetism of metamorphic rocks: errors owing to intrinsic anisotropy, *E. Irving & J. K. Park* 489

Physics of rocks
Some new rheological experiments on igneous rocks at temperatures up to 1120° C, *S. A. F. Murrell & S. Chakravarty* 211

Research note
Palaeomagnetism of metamorphic rocks: errors owing to intrinsic anisotropy, *E. Irving & J. K. Park* 489

Seismology
Critically refracted waves in a spherically symmetric radially heterogeneous Earth model, *David P. Hill* 149
Multimode surface waves for selected focal mechanisms—I. Dip-slip sources on a vertical fault plane, *G. F. Panza, F. A. Schwab, & L. Knopoff* 265
Median Valley seismology: the Mid-Atlantic ridge near 45° N, *T. J. G. Francis & I. T. Porter* 279
The deconvolution of teleseismic *P* waves from explosions MILROW and CANNIKIN, *William H. Bakun & Lane R. Johnson* 321
Microearthquake studies using sonobuoys: preliminary results from the Gulf of California, *I. Reid, M. Reichle, J. Brune & H. Bradner* 365

Tectonics
A model for the horst and graben structure of midocean ridge crests based upon spreading velocity and basalt delivery to the oceanic crust, *Roger N. Anderson & H. C. Noltimier* 137
Interpretation of measured movement at a Himalayan (Nahan) thrust, *H. Sinvhal, P. N. Agrawal, G. C. P. King & V. K. Gaur* 203

Upper mantle
On the structure of the low velocity zone, *Donald V. Helmberger* 251

SUBJECT INDEX

PAGE

Earth's core and mantle

Some recent work on Earth models, with special reference to core structure, *K. E. Bullen & R. A. W. Haddon* 31
Calculation of body waves, for caustics and tunnelling in core phases, *P. G. Richards* .. 243
Non-steady geomagnetic dynamo models, *T. Rikitake* 277

Earth's crust and upper mantle

A seismic refraction survey in the northern Rocky Mountains: more evidence for an intermediate crustal layer, *A. L. Hales & J. B. Nation* 381

Electrical studies

The interpretation of magnetometer array studies, *D. I. Gough* 83
Non-steady geomagnetic dynamo models, *T. Rikitake* 277
Theory for magnetotelluric observations on the surface of a layered anisotropic half space, *D. Loewenthal & M. Landisman* 195

Letter to the Editors

Ansell, J. H., Precursors to *PKP*: seismic wave scattering and spectral data 487

Mathematical models of geophysical phenomena

Velocity, stress and temperature solutions for rectilinear glacier flows with sliding at the bed, *G. K. C. Clarke* 55
Three-dimensional numerical model of the Irish Sea, *N. S. Heaps* 99
Deformation and instability of underthrusting lithospheric plates, *H.-S. Liu* 185
Finite amplitude convection through a phase boundary, *F. M. Richter* 265
Non-steady geomagnetic dynamo models, *T. Rikitake* 277
Evolution of the downgoing lithosphere and the mechanisms of deep focus earthquakes, *M. N. Toksöz, N. H. Sleep & A. T. Smith* 285

Seismic data management

Crustal tilt fields and propagation velocities associated with earthquakes, *E. Berg & W. Lutschak* 5
Analysis of microseismic noise at LASA, NORSAR and ALPA, *J. Capon* 39
The measurement of apparent velocity and azimuth using adaptive processing techniques on data from the Warramunga seismic array, *D. W. King, R. F. Mereu & K. J. Muirhead* 137
Automatic processing of multi-array long-period seismic data, *H. Mack & E. Smart* 215
Aleutian strain events: observations and interpretations, *J. H. Pfluke & R. M. Stewart* .. 229
An attempt to detect gravitational waves with the Yellowknife seismic array, *D. H. Weichert* 337
Observations of normal modes from 84 recordings of the Alaskan earthquake of 1964 March 28—II. Further remarks based on new spheroidal overtone data, *A. M. Dziewonski & F. Gilbert* 401
Precursors to *PKP* seismic wave scattering and spectral data, *J. H. Ansell* 487

Seismic measurement technique

On the feasibility of long-distance laser strain meter measurements through the uncontrolled atmosphere, *W. H. Cannon* 457

Seismic wave propagation and inverse theory

Marginal solutions to quasi-linear inverse problems in geophysics: the edgehog method, *D. D. Jackson* 121
